Privileged & Confidential
A/C Communication

Mike,

Thanks for the update. Yes, I agree with you. We have to use the existing NPDES permit until the state approves a mod. Anything else is not legally binding and is purely speculative.

Mark

Subject: Work plan comments call - Privileged and confidential

Hello Guys,

Just finished my call with CFAC/Glencore and Roux. The call went pretty good. There were a few DEQ comments I would like to discuss with you.

The state has told them to update their NPDES permits, but the existing permit is under appeal and won't be addressed for probably a year, and I tend to agree that we use the existing permit until it has been changed (if it is changed after the appeal). Your thoughts?

Only a couple on the CDM side where they have made a good effort in order to address and I may need to make an executive decision on them. I will go through their comment responses in detail tonight, we have another meeting planned for tomorrow to go into more detail after I have a chance to read all the comments and then I promised to (attempt) to get through the redlines by Friday.

Thanks,
Mike
